Advanced engineering for your peace of mind

At Kia, the process of improving all aspects of safety is relentless. As a result, continuous engineering advances and breakthroughs in material design have led to Rio’s exceptionally strong body construction, strategically placed airbags, and advanced sensors, all of which help to increase your protection.

ADVANCED AIRBAG SYSTEM
An advanced airbag system helps protect driver and passengers with dual front, front seat-mounted side, and full-length side curtain airbags and is complemented by a driver’s knee airbag.

AIRBAG & SEAT-BELT SENSORS
This advanced system monitors the severity of certain impacts, the presence of a front passenger and seat-belt use, and then controls airbag inflation accordingly.

FRONT SEAT-BELT PRETENSIONERS
Pretensioners have been designed to tighten the front seat belts in the event of certain collisions. This can help to reduce the likelihood of injuries.

HEIGHT-ADJUSTABLE SEAT-BELT ANCHORS
The front height-adjustable seat-belt anchors allow the driver’s and front passenger’s seat belts to be raised and lowered for a proper fit.

FRONT & REAR CRUMPLE ZONES
Both front and rear crumple zones are engineered to help absorb and disperse impact energy, helping to preserve the basic structural integrity of the vehicle’s passenger compartment in certain collisions.

SIDE-IMPACT DOOR BEAMS
All doors are reinforced with steel beams to help absorb impact energy and deflect side-impact force. The A and B pillars are also reinforced to help strengthen the body of the vehicle.

LATCH SYSTEM
Easy-to-use Lower Anchors and Tethers for Children (LATCH) system is engineered to let you securely install a compatible child seat at either end of the rear seat.
