IS 200t

Aggressive styling, all-new 2.0-liter turbocharged in-line 4-cylinder engine delivering 241 horsepower and 258 lb-ft torque, and eight-speed Sport Direct-Shift transmission with paddle shifters. Zero to 60 in 6.9 seconds. Rear-wheel drive.

IS 300

Full-time all-wheel drive (AWD) with a 3.5-liter V6 engine delivering 255 horsepower and 236 lb-ft torque, and six-speed transmission with paddle shifters. Zero to 60 in 6.1 seconds.

IS 350

Dynamic performance provided by a 3.5-liter V6 engine delivering 306 horsepower and 277 lb-ft torque, and eight-speed Sport Direct-Shift transmission with paddle shifters. Zero to 60 in 5.6 seconds (RWD) / 5.7 seconds (AWD). Rear-wheel drive or available all-wheel drive.

IS F SPORT MODELS

In addition to the three IS engine choices, each model can be taken to the next level with a more dynamic F SPORT-tuned suspension, and bold interior and exterior styling including F SPORT front seats with enhanced bolsters. An Adaptive Variable Suspension (IS 350) and Variable Gear-Ratio Steering (IS 350 RWD) are also available.
CHOOSE YOUR FAST LANE.

For those who refuse to follow, the new 2016 IS line boasts more ways to lead than ever before. With three models and exhilarating power across the board, choosing from the all-new IS 200t, the all-new IS 300 and the IS 350 may be the most thrilling decision you'll ever make.

IS F SPORT shown in Atomic Silver.
With an array of performance options, the IS line not only turns heads on the road, it even refuses to go unnoticed while parked. Punctuating its aggressive stance, you’ll find arresting details like inset LED daytime running lights and a sculpted line that moves from the rocker panel through the rear wheel arch and culminates in the dramatic sweeping taillamp.
THREE MODELS. ONE QUANTIFIABLE DIFFERENCE.

While the engines of the most powerful IS line ever may differ, the result is the same: full-throttle exhilaration. Need proof? The numbers speak for themselves.

The IS 200t wields an efficient and highly responsive 241-horsepower turbocharged engine. Featuring standard all-wheel drive, the IS 300 offers heart-racing power courtesy of an impressive 255-hp engine. And for the ultimate experience, the IS 350 has a lightning-fast eight-speed Sport Direct-Shift transmission and rockets ahead with 306 horsepower.
When developing the first-ever IS 200t, we didn’t outsource our turbocharger design like some automakers. It was engineered with our own highly evolved twin-scroll turbocharger technology. The result? An impressive 241 horsepower and 258 lb-ft of low-end torque for responsive performance that you can feel the moment you accelerate.

And, when pushing the IS 300’s 255-horsepower V6 above 4,500 RPM, the cabin is filled with a throaty engine note that complements the invigorating all-wheel drive performance of the vehicle itself.
Boasting an impressive 306-horsepower, 3.5-liter V6 engine, the IS 350 demands its share of attention. But the technology inside is also noteworthy. The IS 350 offers the advantage of Ingenuity Dual Variable Valve Timing with intelligence (VVT-i), which helps provide enhanced fuel efficiency, added torque at lower speeds and greater acceleration at higher speeds.
MULTIPLE TRACKS, ONE PURPOSE.

Connecting the driver and the road in a visceral way should never be left to chance. Which is why the IS was tested and tuned on the world’s most iconic tracks, including Fuji Speedway.

Each test refined the IS to the point of precision. The highly rigid body is courtesy of laser screw welding techniques, varied panel thicknesses and an innovative adhesive bonding process. While the steering system is optimized to offer greater feedback and responsiveness. In addition, a wide track offers greater control and agility, helping the IS to master every curve and stretch.
PADDLE-SHIFT TRANSMISSIONS

Brace yourself for an uninhibited driving experience. For added engagement and lightning-quick gear changes, every IS features steering-wheel-mounted paddle shifters. The IS all-wheel drive models are equipped with a six-speed automatic transmission, while rear-wheel drive models feature a Sport Direct-Shift eight-speed automatic transmission that includes downshift throttle blipping for more precise shifting and quicker response.
ALL-WEATHER DRIVE

Fun doesn’t have to take a snow day with the IS 300 and IS 350 AWD. By automatically allocating engine power between the front and rear axles from 50/50 to as much as 30/70, all-wheel drive can help provide enhanced traction and control on a wide range of road surfaces and conditions.
360-DEGREE CONTROL

From climate controls adjusted with the slide of a finger to a Drive Mode Select dial that enables you to make your vehicle more responsive, innovation surrounds you inside and out, keeping you a step ahead, every step of the way.
Though the interior was designed for the driver, every seat can be enjoyed. In the front, it’s the liberating combination of low-set seating with high-tech innovation, while passengers in the rear enjoy spacious comfort. Convenience is also provided with the versatility of 60/40-split fold-down rear seats.
LEXUS ENFORM

THE NEXT LEVEL OF CONNECTIVITY

LEXUS Enform, our available suite of branded connected services, consists of five products, each of which offers unique ways to enhance the driving experience. With a complimentary first year of service—entertainment, convenience and peace of mind are now within reach.

SAFETY CONNECT

LEXUS Enform Safety Connect® offers you the peace of mind of knowing that assistance can be there when you need it most. Whether you’re involved in a collision and unable to call for help, your vehicle is stolen, or there is some other type of emergency, assistance can be sent directly to your vehicle’s GPS location.

SERVICE CONNECT

Our new LEXUS Enform Service Connect® offers remote access to information about your vehicle’s status and maintenance needs. Easily accessed through LexusDrivers.com or the My LEXUS and Beyond mobile app, you can get information on everything from your vehicle’s fuel level and mileage to maintenance alerts and vehicle health reports.

REMOTE

The LEXUS Enform Remote® mobile app can remotely start the engine, lock and unlock doors, check the status of doors and windows as well as your fuel level, and can help find your vehicle’s location in a parking lot. And, should you loan your LEXUS to another driver, you can receive instant alerts if, for example, a preset speed or mile limit is exceeded.

DESTINATIONS

LEXUS Enform Destinations® offers convenient 24-hour, en-route navigation assistance from a live response center agent who can help you find locations and automatically upload the destinations to your available Navigation System. Planning a trip? You can also search, save and upload destinations from the comfort of your home or office.

APP SUITE

The LEXUS Enform App Suite® offers access to your favorite mobile applications through your vehicle’s center-console display. After downloading the app on your compatible smartphone, you can search local listings, stream music, place restaurant reservations and buy movie tickets—all from the center-console display.

SAFETY CONNECT

DELIVERY AND TECHNOLOGY SPECIALISTS

To help you get the most out of these and other LEXUS features, a Vehicle Delivery Specialist will walk you through nearly every setting and function you desire. And to answer questions that arise after delivery, a Vehicle Technology Specialist can offer expert guidance in person or without you ever leaving the driveway via camera-enabled iPad® apps like FaceTime®. Learn more about these complimentary services at lexus.com/specialists.

RESPONSIVE, INSIDE AND OUT.

PRE-COLLISION SYSTEM

The available Pre-Collision System (PCS)\textsuperscript{13} is engineered to detect an imminent frontal collision and, while retracting the front seatbelts, automatically prepares Brake Assist\textsuperscript{14} for increased braking response, and is even designed to automatically begin braking before impact, to help reduce impact energy.

BLIND SPOT MONITOR

To help you change lanes with confidence, the available Blind Spot Monitor\textsuperscript{11} is designed to detect and warn you of vehicles approaching or positioned in the adjacent lanes. And when you’re backing out of a parking spot, the Rear Cross-Traffic Alert\textsuperscript{12} is designed to notify you of approaching vehicles that might be out of camera view.
VOICE RECOGNITION

Command your IS with ease. The available advanced voice command enables you to place compatible Bluetooth®-enabled phone calls and operate climate, audio and navigation functions using normal, everyday speech. If you say “It’s too hot in here,” for example, the climate control will automatically lower the temperature by four degrees. With Enhanced Bluetooth® technology®, compatible Bluetooth® mobile-phone address-book contacts can be viewed and accessed on the Navigation System® display or via voice command.

MARK LEVINSON® AUDIO

Power isn’t limited to performance on the road. The available 15-speaker, 835-watt Mark Levinson® Premium Surround Sound Audio System® is powered by a 12-channel digital amplifier and features a DVD/CD player. The rear speakers employ an acoustic lens design. By significantly widening the dispersion of sound, a larger “sweet spot” is created, enveloping every passenger with three-dimensional sound that rivals the finest home-audio systems.

3-D NAVIGATION

This available voice-activated system® can map millions of points of interest across the country and can display information in English, French and Spanish. And, in addition to offering up-to-date traffic and weather information®, 3-D city views, and simulated views of approaching highway junctions, it displays the current speed limit and can automatically identify nearby fuel stations if you begin to run low on fuel.

TOUCH CLIMATE CONTROLS

Hot? Cold? Just swipe. Even its dual-zone climate-control system is precision-tuned. Electrostatic touch-based controls enable you and the front-seat passenger to change the temperature one degree at a time by swiping a finger up or down the control, or by pressing the arrows themselves.
IS F SPORT

Leave convention behind and take the IS to the next level with a dynamic F SPORT suspension tuned by the same team that was behind the LFA supercar. The iconic F SPORT grille and sculpted front fascia demand attention. While on the inside, you’ll find eye-catching LFA-inspired gauges and bolstered sport seats that are designed to help keep you firmly planted in high-G turns.

DEFY MODERATION
Feel confidence through every curve with F SPORT front seats designed to hold you through even the most aggressive of turns. Featuring enhanced bolsters and a unique foam-injected construction designed to cradle the driver, these sport seats will have you wrapped from hip to shoulder—especially in high-G situations. Their low position helps place the driver's hip point as close as possible to the vehicle’s center of gravity for a more dynamic driving experience.
EXHILARATION ON DEMAND.

DRIVE MODE SELECT

Customize your dose of adrenaline. On every IS, Sport S mode alters the powertrain for faster gear changes and more dynamic throttle mapping. Sport S+ mode on the IS 350 F SPORT goes a step further by tightening the suspension for reduced body lean, and provides greater steering response when equipped with Variable Gear-Ratio Steering. In every model, the transmission’s shift points are automatically altered coming into and out of corners for sharper acceleration.

THE INSPIRATION

A 1,500°C blue flame

THE RAW MATERIAL

Ultrasonic Blue Mica 2.0™ pigment from 98-year-old Kansai Paint Company

THE METHOD

SONIC paint technology aligns the angles of reflective particles for uniform reflectivity

THE APPRENTICE

Lexus mapped the painting motions of a master craftsman in order to duplicate the technique with robots

THE UNWAVERING STANDARDS

Waterfalls in painting facilities trap dust

THE ART OF COLOR

One unexpected moment of inspiration, years of development and zero shortcuts. This is the art of creating art. A combination of passion for design and industry-leading knowledge, every Lexus color features stories and processes as unique as their hues. Take the Ultrasonic Blue Mica 2.0™. Designed to convey passion and power, it was inspired by and created specifically to mimic the color and intensity of a 1,500°C blue flame. It’s an effect not left to chance, which is why Lexus sources pigment from a company in Osaka—one that’s been perfecting its craft for 98 years and counting. It’s also why every Lexus painting facility features indoor waterfalls to trap and wash airborne dust particles away so they don’t inconspicuously mar the vehicle’s finish. Even science plays a role. Lexus created a technique that more uniformly aligns the angles of the reflective particles in paint to better accentuate the vehicle lines. Then mapped the motions of arguably the most gifted automotive painter in the world in order to have robots duplicate his craft on every Lexus vehicle. Because the only thing more important than creating a stunning work of art is making sure each is as stunning as the last.
